INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2004/005391

Box No. I Basis of the report
 With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item. This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of: international search (under Rules 12.3 and 23.1(b)) publication of the international application (under Rule 12.4) international preliminary examination (under Rules 55.2 and/or 55.3) With regard to the elements* of the international application, this report is based on (replacement sheets which report as "originally filed" and are not annexed to this report):
Description, Pages
1-31 as originally filed
Claims, Numbers
1-17 received on 10.11.2005 with letter of 10.11.2005
Drawings, Sheets
1/2, 2/2 as originally filed
a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing The amendments have resulted in the cancellation of: the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify): This report has been established as if (some of) the amendments annexed to this report and listed below Supplemental Box (Rule 70.2(c)). The description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify): * If item 4 applies, some or all of these sides.
* If item 4 applies, some or all of these sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2004/005391

Reference is made to the following documents:

D3: DE 199 01 041 A D4: US-A-3 894 917 D10: US-A-5 849 590

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1 and 17 is not new in the sense of Article 33(2)

claim 1:

D10 discloses a method for marking a material (explosive material), the method comprising the steps of:

- identifying at least one ion (col. 9, l. 2-42¹) comprised in the said material at a concentration level of below 50 ppm in the unmarked state (col. 7, l. 57- col. 8, l. 34) state that the marker concentration of a selection of rare elements in natural abundance is between 0.001 ppm and 40 pm)
- selecting a marking composition comprising at least one ion as identified in step 1
- incorporating the marking composition of step 2 into the said unmarked material (abstract; col. 9, l. 12-44)

wherein the concentration level of the said at least one ion in the marked material is increased in step 3 by at least the factor of 3 as compared to the concentration level of

The examining authority wants to stress in this report that **D10 does** disclose ion-marking materials. It is explicitly noted in **D10** (col. 9, I. 23-37) that water soluble ions (as nitrates, chlorides, acetates and citrates) are used as marking materials.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2004/005391

the ion present in the unmarked material (up to 100 ppm in comparison to average ion concentrations in the material of 1-10 ppm; see also col. 7, l. 57- col. 8, l. 33; col. 9, l.

claim 17:

For reasons analogous to those given for claim 1, the subject-matter of independent claim 17 is not new either (col. 4, I. 26: tagging of foodstuff/grain).

Varioups dependent claims do not contain any features which, in combination with 2. the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step, see documents D3,D4,D10 and the corresponding passages cited in the search report.

claim 2: D10: (col. 10, I. 16-22) claim 3: D10: concentration of rare elements is known (col. 8, l. 8-25) claims 4-8: D10: (col. 8, I- 5-34; col. 9, I. 23-42) claim 9: (col. 4, I. 26: tagging of foodstuff/grain). Subject-matter not D10: inventive; the spilled shipments could also be drugs or pharmaceutical products etc. claim 10: D10: (col. 7, I. 12-22) claim 11-13: Not inventive; analysis in D10 can be performed by a wider variety of techniques (e.g. D3, D4) claim 14: D10: (col. 10, l. 16-22) claims 15-16:

(col. 10, I. 16-22)

D10:
